Maintaining your dialysis regimen is vital for your health, but it may also remove some of your vitamin C, B vitamins, zinc, and other nutrients.

**This is why Patient Care America's NutriPlan+<sup>SM</sup> program now offers patients on IDPN or IPN therapy a bottle of NutriRite Dialyvite 800 Multi-Vitamin.**

### **This Dialysis Friendly Multivitamin Includes:**

- Biotin** ➡ Helps your body use carbs, proteins, and fats for many beneficial actions.
- Niacin** ➡ Helps the body heal itself and may also help your phosphate levels.
- Folate** ➡ Supports heart health and other systems in your body.
- Thiamine** ➡ Helps your body make energy!
- Vitamin C** ➡ Helps boost immune function.
- Riboflavin** ➡ Let's your body put your food intake to good use.
- Vitamin B6** ➡ Keeps your protein stores, immune function, and brain healthy!
- Pantothenic acid** ➡ Let's your body synthesize fatty acids which you need for your cells.

**Ask your Registered Dietitian if  
Patient Care America's NutriPlan+<sup>SM</sup> program is good for you.**
